# CREATING MOMENTS

Does life get any better than exploring the world together? Because everything is: Better Together. For this reason, the high-quality protectors by RECARO combine safety, ergonomics and function with unique design. For worry-free moments and stress-free mobility. This way, you can thoroughly enjoy care-free moments together. For the most precious times. For lots of “we”. For moments that last for ever – just like the first ever photo.

## Everything is better together.

The first ultrasound picture of your little treasure: with that, a totally new era begins. A wonderful time, because now you are a family. RECARO products are here so that, right from the very beginning, you can enjoy every moment together relaxed and stress-free. Whether the first visit to the doctor, daily shopping trips into the city, or your first holiday together: our high-quality travel companions combine quality, functionality and design on all your journeys. Because everything is a little simpler together. Because together, everything works. Because family means being together.

## Because today is the best day – and tomorrow, too.

Our child seats are unique combinations of the highest level of safety, simplest handling, ergonomic use for parents and long-lasting quality. And all that in the most modern designs. As a premium manufacturer, RECARO provides reliable support for your family – for big journeys, but also for little all-day adventures. So that every day is the best day of your family life together.

**We look after the safety and protection of children. Furthermore, we want our products to help families to be mobile without limitations and travel stress-free in everyday situations. To this end, we focus on the highest safety and quality in addition to well thought-out innovation.**

## Safety, quality and design – for every family.

Every family is different. But when it comes to safety, everyone agrees: only the best is good enough. And this is precisely how we see things, too. Whatever your personal everyday challenges look like: we at RECARO combine intelligent functions and pioneering technologies in an authentic product that promotes well-being. Our child seats are comfortable and safe. Every product slots perfectly into your life. For stress-free “we” moments – Better Together.

## Why we understand what parents want.

Behind every single RECARO child seat is 110 years of experience. Our skills in engineering have continuously developed during this time. Today, each of our products is packed with pioneering technology and unique functionality. We combine knowledge gleaned from the development and production of high-quality racing and aircraft seats to create the perfect child seat. Aside from this, our designers are also mums, dads, aunts and uncles. For this reason, we work every day to ensure the safety and well-being of the little ones in your family. We want to support you. Will you come with us on a unique journey?

**Today is our favorite day. And tomorrow, too.**

# CREATING SAFETY

When it comes to safety there are no compromises. To this end, ensuring that your children are safe and come to no harm is our first priority. Our solutions regularly exceed the legal standards and impress renowned testing institutes and parents around the globe. The combination of reliable safety technology and outstanding product quality keep families at ease during all journeys. And the little ones? They sit comfortably and safely and are able to drift off into sweet dreams.

## We do everything to ensure the safety of your child.

How do you gain trust? By always doing more than others expect. We equip our child seats and strollers with significantly more safety features than required by safety standards. Our engineers and designers wouldn't have it any other way: the pioneering spirit is embedded deep in RECARO's company philosophy. We don't just want to be among the best. We want to be the best. So that parents trust us. On every road. On every journey.

## Why safety standards alone are insufficient.

Our safety technologies go above and beyond protection in the case of an emergency. When carrying your infant carrier, when placing your child into the child seat and throughout the entire journey itself – we design your everyday family routine simply and safely. Adaptive functions, foolproof handling, intuitive seating – these aspects combined lead to the best results. In this way, we guarantee parents the highest level of safety. We incorporate the results from renowned testing institutes into our development process: ADAC, Stiftung Warentest (German consumer and goods testing organisation) and, last but not least, the biggest specialists in this area – families.

## Tested, prize-winning – judged to be very good.

By combining safety, ergonomics and function with appealing designs, we are setting new standards for the transport of infants, babies and small children. This is corroborated by numerous awards and successful consumer tests.

## What happens during a crash test?

During a frontal crash test with a child seat, a crash test sled travelling at around 70 km/h is brought to an abrupt stop in a matter of milliseconds. This produces an enormous amount of energy: some 40 times as high as the gravity on earth. Our infant carriers and child seats are equipped for this emergency. Our infant carriers and child seats aim to organise your everyday routine as a family in a worry-free and relaxed way – safety included.

## i-Size

Rear-facing transport, optimised side collision protection and the intuitive ISOFIX installation offer little travellers maximum safety in the rear seat. In the event of a frontal collision, the energy is dispersed across the entire body, whereby the sensitive head and neck area stay protected. i-Size or UN R129 were developed with the help of the newest testing methods concerning child safety inside cars and describe the most up-to-date standards with the highest demands on safety.

The new EU safety directive stipulates all children must travel in a rear-facing direction until the age of 15 months. Our safety experts recommend transport facing away from the direction of travel up to the age of 4 years, where possible.

## Protection from side collisions

The side collision protection in our child seats consists of detachable, collapsible or integrated systems. In this way, the child seat can be optimally and quickly adjusted for each journey. Through our Advanced Side Protection systems, we guarantee protection far beyond the legal requirements. Forces generated in the event of a collision are absorbed and intercepted by the child seat. For even more everyday crash performance.

## HERO safety system

Our HERO safety system stops the harness from slipping and twisting. The harness and shoulder pads are brought into the correct position, together with the headrest. The patented technology likewise ensures that, in the event of a crash, all forces are diverted. For maximum child safety.

# CREATING SAFETY

Our child seats have a long road behind them when they finally go into production. During this process we work together with international testing institutes; intensive and extensive tests round off the development of our products. In the final stages, no one is as critical of the result as our team of engineers and designers themselves. You can be sure that RECARO only provides you with solutions for your daily routine that we ourselves are absolutely convinced of. Anything else is out of the question for us.

## Known for our seats – and our pioneering spirit.

There are people, for whom the safety of your child is as close to their heart as it is to yours: our employees. We at RECARO are also parents, aunts, uncles or grandparents. We see it as our task to offer you the best solution for your everyday challenges. And there's more:

we develop protective companions, who will be along for the ride on all family excursions and trips for a long time. Only someone who has done as much as this has earned your trust.

**We at RECARO are parents ourselves and want to offer you the best and safest solutions. This is why we go far beyond the necessary safety standards every day.**

## The most stringent tests in the world.

We work together with renowned testing institutes to consistently improve our products and generate new insights: DEKRA, TÜV in Germany, TASS in the Netherlands and many other partners worldwide. We don't carry out these tests simply to meet standards and comply with norms. It is our goal to compete and improve on an international level. For us, this also includes the tests derived from the EURO NCAP, such as those carried out by Stiftung Warentest and the ADAC. Not just to take part, but to perform our very best – that is our drive.

## Safety and quality that you can feel.

Our collections bring together the highest levels of quality and security, in addition to the aspiration of our teams to be better and safer than the day before, every day. For this reason, every child seat is put through a multi-level series of testing. Our engineers and designers invest lots of time in development, right up to the production stage. Because one thing is clear: the combination of passion and knowledge leads to the best result. Our focus is naturally geared towards emergencies. Nevertheless, durability also plays a central role for us as a premium manufacturer. To ensure that you can thoroughly enjoy your downtime together. Together with your RECARO child seat – Better Together.

## One touch says more than a thousand words.

Are you familiar with our most recent designs? At reputable retailers you can test out our child seats and strollers at your leisure. And you will be surprised: it is actually possible to feel safety.

**All the way. All the day.**

# CREATING CARE

Healthy posture is essential for little explorers. In cooperation with leading orthopaedists and physiotherapists, we have made our child seats and strollers the perfect companions for every journey. From the very first day of use, RECARO products ensure that your child's back receives optimum support when sitting and through any motion sequence. Smart functions also make handling easier for parents. Together with skin-friendly textiles in fashionable designs, attractive and supportive travel companions for each journey are born – Better Together.

## Child seats that provide safety and support.

During the development of our products, ergonomic seating position plays an important role. With help from the latest medical insights we develop our patented technology, bringing together healthy ergonomics, robust quality and simple handling in a unique fashion. With RECARO, children are in the best of hands – from their first burp, to their first trip to the cinema. Perhaps the infant carrier or the stroller will become their second favourite place – after mum and dad's lap of course.

## Our travel tip for young parents:

When travelling with a baby in the car we recommend you make regular stops. That way your little darling can stretch out and exercise on the amply sized crawling rug. Thus, you are supporting the healthy development of your child. Even with older children, regular stops to stretch their legs promote a sense of well-being. And this comes with a good mood.

**Babies are far more sensitive to movement and touch. With skin-friendly materials and a comfortable place to sit, we make it easy for the little traveller to enjoy every journey.**

## Infant carriers that adjust to your baby.

The special combination of height-adjustable headrest with integrated harness in the reboarder Salia relieves pressure on the spine and the entire body. With an individually adjustable seating angle, your child can sit comfortably during your journey or pleasantly drift off to sleep at will.

## Child seats that grow with your infant.

The child seat Mako Elite is equipped with an adjustable legrest. These provide your child with additional support. The rest can be individually adjusted. So-called Smart Protection Wings adapt to the shoulder width of your little darling and automatically "grow" with them thanks to the adjustable backrest.

## Intuitive materials for your daily routine.

Our current textile innovation is both light and airy, while being long-lasting and robust during daily use. Through the use of breathable covers, we ensure the ideal climate of well-being for your child. Smart openings in the structure of the seat and mesh material form a continuous air ventilation system. This way, your baby feels at ease and won't start to sweat. And the infant carrier will stay as nice as it was on the first day of use for a long time.

## Functions that make life easy for parents.

To ensure you can attach your child seat effortlessly, we also offer you a modular system with a base. With just one click, the child seat is made secure. Practical indicators display a green light when everything is in the correct position. And the best thing: the base can be simply disassembled and stowed away.

# CREATING CARE

Smelling, touching, feeling, tasting – babies perceive their world with all senses. A pleasant feeling on the skin and back-friendly position are particularly important for newborns, so that they can quickly find peace in their highly stimulating everyday lives. To this end, at RECARO we combine unpolluted materials and healthy ergonomics. For each individual stage of work we also strive towards sustainability. All this together lets our children grow up as they deserve. After all, it is they who will shape the world of tomorrow. Hopefully together – Better Together.

## Ergonomically valuable for parents.

Developed with leading ergonomics specialists, intensively tested in various stages of development and evaluated by the objective opinion of renowned testing institutes: every design from RECARO unites functional, ergonomic and aesthetic components. In this way, we support the whole family in their everyday routine. Whether with 360 degree rotational seating, the child seat indicators on the base or our one-handed folding system for strollers, we make it easy for children, parents and grandparents to enjoy moments together. Because that is what counts.

## Long-lasting and sustainable products.

With the birth of a child, the awareness of the parents changes too: tested, long-lasting and environmentally conscious materials are in demand. For one thing, your little darling should have a general sense of well-being. For another, you would like to contribute to looking after our planet for your children and grandchildren. We at RECARO are aware of our dual responsibility. For us, quality always means sustainability, too. To this end, we advocate particularly long-lasting products and a production process that conserves resources.

## Six skin-friendly facts for parents.

The skin of babies and little children is particularly sensitive, especially to touch. This means it can react much more strongly to contaminants, uneven surfaces and temperatures. For this reason, our designers and engineers are especially discerning when it comes to the selection and processing of our materials and textiles.

### 1. Going beyond standards

We go far beyond the standards required by law.

### 2. Unpolluted materials

We demand durability and freedom from contaminants from our materials.

### 3. High quality textiles

Easy to maintain, machine-washable, quick-drying textiles and long-lasting quality.

### 4. Phenomenal padding

We use high-quality foams from the automotive sector – we can therefore guarantee long-lasting padding for comfort over many years.

### 5. Best processing

All textiles and stitching are subjected to strict endurance tests.

### 6. Independently inspected

Additional testing from independent institutes and the fulfilment to all EU norms.

**You care. We care.**

# CREATING VALUE

With a small child, each day holds new challenges. How reassuring to know that with RECARO, you have a companion on your side who will provide you with safe, reliable support. Our premium products have proved themselves over many years and are constantly setting new standards with regards to function, comfort, quality and design. No matter your destination: we are there for your family – for safe mobility and more “we” moments.

## Our values reveal who we are.

Our focus is on safety and quality, united in an appealing and tangible design. Through pioneering technology, such as our patented HERO safety system for example, we create additional value for parents. This is corroborated by numerous national and international awards. For us, these milestones are the best seal of quality, alongside many satisfied families, and a confirmation that we are on the right track. Our promise to you: we will not stop getting better every day.

## Here we let our references speak for us.

Our products have already won numerous international awards. These accolades are proof of our extensive engineering skills and expertise.

## Safety is our top priority.

Everything begins with the optimal level of safety. Short trips, long excursions or the first holiday together: we make family life worry-free and safe for everyone. For nothing is more important than feeling at ease on your trip through the city or on a long journey with your child. At RECARO, we are naturally concerned with protecting your little darling in an emergency. We also want to support you every day in every situation. So you can enjoy every moment together as a family – Better Together.

## Quality is a prerequisite for everything.

Long-lasting materials, ingenious technologies and the most stringent tests: we at RECARO leave nothing to chance. Because we are convinced that good products can only come about from good work. We also advocate for sustainability here. Our processes conserve resources and impress parents worldwide.

## All of this together is RECARO.

Now you know who we are and what we do. Please, come and pay us a visit at one of our retailers and get acquainted with our infant carriers and child seats. Because one thing is certain: for every family and every need, we have just the right solution.

## Design that looks good and makes sense.

It isn't just the design that is an integral part of our premium products. The design also has to perform. We call this Ingenious Design. That means visually appealing design is inseparable from intuitive systems, functions and the utility for young parents. Simple operation saves you lots of time and unnecessary worries during your daily routine. A simplified, ergonomic design makes carrying our products easier. This benefits both parents and their children. Because, as you know, a relaxed atmosphere is infectious.

**You support. We support.**

# CREATING TRUST

Trust grows with time. For more than 110 years, RECARO has been building mobile seats and we have made it our mission to support people and transport them safely. The area of child seats has a particularly special importance for us. Because we at RECARO also have children. And so we do everything in our power to ensure your family's safety. On short and long journeys. On the road and in the air. Every day and everywhere.

**“Ingenious Design refers to the combination of function, ergonomics and aesthetics that has always shaped our products.”**

HARTMUT SCHÜRG, CHIEF BRAND & DESIGN OFFICER, RECARO HOLDING GMBH

## **It's the details from which the whole is developed.**

For more than 110 years, RECARO have been dedicated to creating products that combine aesthetics, ergonomics and function. Products that are designed with the utmost care and diligence down to the smallest detail. As such, all our child seats and strollers are simple and intuitive to use. This saves time and allows you to enjoy your moments together even more intensely.

Height-adjustable child seats with 360 degree rotation? Very light and agile strollers? Ergonomic sitting and reclining positions? These aren't just technical subtleties for us, they are the understandable expectation that modern families have for our products. We believe that design should cater to the needs of human beings. Ingenious design – as we call it – is at the heart of our daily work.

What started in 1906 with a manufacturing company for car bodies and interior equipment, soon developed a successful partnership with Porsche. We have always continued to develop ourselves through the production of legendary sports and aircraft seats. The production of safer, especially high-quality child seats and strollers is an area that is very close to our hearts. After all, it is also our children who will shape the world of tomorrow.

Our milestones are evidence that we are on the right track: as early as 1998 RECARO was setting new standards with the first child seat that adjusts to the size of a growing child: the RECARO start. Another member of the RECARO product family, the Zero.1 Elite, was awarded the Gold German Design Award in 2017. As of 2019, this tradition is being pursued further by RECARO Kids. By showcasing many new innovative products we are demonstrating our expertise. To ensure that you can enjoy family moments together on an even deeper level, we will continue to deliver you totally smart, forward-thinking and safe travel companions for all journeys. Safe journey.

## **Over 110 years of design, ergonomics and safety.**

### **1906**

Incorporation under the name of “Stuttgarter Carosserie- und Radfabrik”.

### **1909**

Granting of a patent for the so-called “Reformkarosserie” car body following a name change to “Stuttgarter Karosseriewerk Reutter”.

### **1920**

Production of bodywork and complete interior equipment for almost all notable contemporary manufacturers.

### **1950**

Reutter builds the first out of more than 60,000 German Porsche 356 units.

### **1963**

The bodywork factory is sold to Porsche. Reutter Carosserie becomes the specialist company RECARO.

### **1971**

RECARO starts producing airplane seats.

### **1983**

Fusion of Keiper RECARO and relocation of the entire airplane seat production to Schwäbisch Hall.

### **1998**

RECARO presents the first child car seat that grows with the child.

### **2017**

The innovative Zero.1 Elite receives the golden German Design Award in 2017.

### **2019**

Continuation of the RECARO success story through RECARO Kids.

# CREATING SYNERGIES

The journey is the destination, and our goal is to make this journey as pleasant for you as possible. We have been moving people for over 110 years. With innovative solutions in outstanding quality. Discover the future of seating.

## RECARO Automotive Seating Control on every track.

Feel the road. Stay in control. Enjoy every curve. A passionate, pioneering spirit. From the legendary Sport Seat, to back-friendly models for long-distance drivers, to professional racing shells. The same performance on the road as when pushing limits on the race track. One hundred percent support for total concentration.

## RECARO Aircraft Seating Arrive relaxed.

See the world with different eyes. Let your mind wander. Enjoy the trip. RECARO aircraft seats are in a class of their own. Ingenious Design is combined with exceptional comfort about the clouds. Arrive relaxed, rested, and ready for new challenges. Thanks to the low weight, long-lasting quality, and simple maintenance, airlines save money in the long term and lower their CO2 emissions. Sustainable, efficient, and comfortable.

## RECARO eGaming Gaming on a new level.

Only milliseconds to make just the right move. It's all that stands between victory and defeat. Developed from the ground up with the gaming community, RECARO Gaming Seats are setting new standards. Contours optimized for gaming provide perfect support – even during longer sessions. This means that players can focus on what really matters: the game itself. Carefully considered down to the last detail. For optimum body support and maximum performance.

## RECARO Kids Safe. Simple. Convincing.

Discover a new world every day. With wide eyes. And relaxed parents. Our child seats and strollers not only combine design and first-class workmanship, but above all with a smart safety concept. Clever functions, in combination with RECARO's characteristic ergonomics and intuitive handling, simplify everyday life and protect your little ones. For responsible and demanding parents. Better Together.

# MODULAR SYSTEM

The flexible solution for today and tomorrow.

Children grow. The Avan/Kio Base stays. Our i-Size base can be used as a modular system from birth up to approx. 4 years, first with the infant carrier Avan and then with the reboarder Kio. With just a single click, your child is secured into the vehicle. The indicators show at a glance whether everything has been correctly installed. This saves you valuable time on each journey – and everyone stays relaxed.

## MODULARITY THAT ACCOMPANIES YOU

# AVAN / KIO BASE

The safe combination.

## Easy and safe, every day.

The Avan/Kio Base makes the infant carrier Avan and the reboarder Kio your easy and safe everyday companion for any situation. Both models boast a practical, modular system and a base that can stay in the vehicle for the entire period of use. Thanks to the base, both child seats can be quickly and firmly installed in any car with just one click. Perfect for the fast pace of family life. The combination of base and child seat is a perfect match, both technically and in terms of colour. From birth to a height of 83 cm (about 15 months), the infant carrier Avan can only be used rear-facing. It can

either quickly and easily click on to the Avan/Kio Base or be strapped in using the vehicle's seat belt. You can use the reboarder Kio for your baby from a height of 60 cm (about 3 months) or, with the additionally available newborn inlay, right from birth. We recommend using the reboarder rear-facing for as long as possible – if possible up to a height of 105 cm or about 4 years of age. Once your little one is 16 months old, you can also use the reboarder forward facing. For safe journeys – both long and short.

## SAFETY FEATURES FOR EVERY JOURNEY

**Modular system**  
The Avan/Kio Base can be used as a modular system in combination with the infant carrier Avan and the reboarder Kio

**ISOFIX connection**  
Ensures secure installation in the vehicle

**Indicators on the base**  
Shows you at a glance if everything is installed correctly with a green light

**Rebound bar**  
Absorbs energy in the event of a collision

**One-click installation with ISOFIX**  
Simpler and more secure one-click installation of the ISOFIX base without the vehicle's seat belt

**Adjustable support leg**  
Easy to adjust in the vehicle and improves stability

## TECHNICAL DETAILS

Standard: UN R129/03 (i-Size)
External dimensions (W/D/H): 35.5 / 65 / 35 – 86 cm
Weight: 7.5 kg

# AVAN

Baby's first guardian.

A weekend away with the baby is something special. During the trip, parents are put at ease if the baby receives the best possible protection in the car. The infant carrier Avan surpasses all safety requirements and your baby enjoys optimal ventilation thanks to smart openings in the outer shell. Whether it's a short trip or a long one, our Avan can be fixed in place with the seat belt or with the optional i-Size base in just a single click. If the baby has outgrown the infant carrier, the Avan/Kio Base can be used as a modular system with the reboarder Kio up to the age of approx. 4 years. This is the making of lots of great trips.

## SAFETY FEATURES FOR EVERY JOURNEY

### Intuitive operation

In just a few movements, the infant carrier can be mounted and removed from the optional base

### Seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

### Newborn inlay

The newborn inlay provides your baby with a flat and ergonomic reclining position

### Patented HERO safety system

A single unit comprising shoulder pads, shoulder straps and headrest prevents the harness from twisting and slipping and simplifies the secure and easy fastening process

### 3-point harness system

The intuitive, central harness adjuster with HERO harness guide enables the child to be fastened into the seat securely and simply

### i-Size

Rear-facing transport in accordance with UN R129 for maximum safety

### Advanced Side Protection (ASP)

Integrated protectors absorb the energy in the event of a side collision

### Height-adjustable headrest with integrated harness

Offers simple, individual adjustment for the growing child thereby providing them with an ergonomic sitting position

### Flexible operation

Can be fastened in place with the vehicle's seat belt or using the i-Size base in just a single click

### Coated belt tongues

Reduces heating up in hot weather – thus preventing your baby's sensitive skin from getting hurt

### Ergonomic carry handle

Optimal carry handle shape for ergonomic carrying, can be adjusted to multiple positions

### Modular system

With the Avan / Kio Base, the infant carrier Avan is installed in the car in just a single click. This makes hectic everyday family life easier for parents and installation more secure, thanks to the indicators, which display when the infant carrier has been correctly installed. When the baby gets bigger, the Avan / Kio Base can be used in combination with the reboarder Kio up to the age of approx. 4 years. For long-lasting joy and many lovely trips and excursions.

**Air ventilation system**

Fresh air keeps everyone happy. This is ensured by openings in the outer shell and mesh inserts in the seat cover, which allow for continuous air circulation. A greater level of comfort and well-being is impossible. Whether they are on a quick journey to see granny or with the whole family on holiday for the summer – the little explorers are kept in the best mood. Regardless of how long the journey is.

**Lightweight**

As a parent with a baby you always have something on your arm or in your hand. Weighing just 4.1 kg, the infant carrier Avan can be easily carried throughout the day. Enjoy the time with your baby and spend the most beautiful moments together.

**Smart harness buckle**

Simple and safe fastening thanks to the intelligent harness buckle: when the baby is removed the harness buckle tilts forward and stays in this position. This way, when the child is put in place they are not sitting on the buckle and parents are able to strap their baby into the infant carrier securely, comfortably, and quickly.

**Travel System**

Psst, just let the baby sleep a while longer: a quick change from car to stroller for the RECARO infant carriers is possible thanks to special adapter – this flexibility allows you stress-free mobility in everyday situations.

**Extra large sun canopy**

The extra large sun canopy with UPF 50 sun protection and the extendable sun visor offer protection for the baby's sensitive skin in the sunny summer months or on your first family holiday together. This way, being outside is fun for everyone.

# KIO

The comfortable travelling companion.

Is there anything better than picking fruit outside with dad and falling asleep contented in the child seat afterwards? With smart openings in the outer shell and mesh inserts in the seat, the little rascal can enjoy the highest level of comfort thanks to optimal air circulation. Mum and dad can breath easier too thanks to the reboarder Kio, which can securely installed in the rear seat in just a single click with the corresponding Avan / Kio Base. And the best thing: before that, the Avan / Kio Base can be used with the infant carrier Avan.

## SAFETY FEATURES FOR EVERY JOURNEY

### 5-point harness system

The intuitive and central harness adjuster with HERO harness guide enables the child to be fastened into the seat securely and simply

### Patented HERO safety system

A single unit comprising shoulder pads, shoulder straps and headrest prevents the harness from twisting and slipping and simplifies the secure and easy fastening process

### Seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

### Memory foam in the headrest

Comfortable for the child and is particularly adept at absorbing forces resulting from a crash or collision

### Energy-absorbing shell

In the event of a collision, the energy is diverted through the shell and absorbed there

### Coated belt tongues

Reduces heating up in hot weather – thus preventing your baby's sensitive skin from getting hurt

### Intuitive operation

All important functions can intuitively be operated one-handed

### Ergonomic design

Flat side bolsters enable the parents to place their child in an ergonomic position

### Height-adjustable headrest with integrated harness

Offers simple, individual adjustment for the growing child, thus providing them with an ergonomic sitting position

### Modular system

With the Avan/Kio Base, the infant carrier Avan is installed in the car in just a single click. This makes hectic everyday family life easier for parents and installation more secure, thanks to the indicators, which display when the infant carrier has been correctly installed. When the baby gets bigger, the Avan/Kio Base can be used in combination with the reboarder Kio up to the age of approx. 4 years. For long-lasting joy and many lovely trips and excursions.

**i-Size**  
Rear-facing transport, optimised side collision protection and the intuitive ISOFIX installation offer little explorers maximum safety in the rear seat. When facing away from the direction of travel, in the event of a frontal collision the forces are distributed across the entire body, whereby the sensitive head and neck areas stay protected. The child seat fulfils the stringent safety standards in accordance with UN R129.

**Air ventilation system**  
Fresh air keeps everyone happy. This is ensured by openings in the outer shell and mesh inserts in the seat cover, which allow for continuous air circulation. Greater comfort is impossible. Whether they are on a quick journey to see granny or with the whole family on holiday for the summer – the little explorers are kept in the best mood. Regardless of how long the journey is.

**Advanced Side Protection (ASP)**  
The integrated protectors can be quickly and simply folded out on the door side. In the event of a side collision, the energy absorbers reduce the force that would act upon the child. The combination of infant carrier, seat structure and side wings offer threefold protection from side collisions. In any car.

**Smart harness buckle**  
Simple and safe fastening thanks to the intelligent harness buckle: when the baby is removed, the harness buckle tilts forward and stays in this position. This way, when the child is put in place, they are not sitting on the buckle and parents are able to strap their baby into the seat securely, comfortably, and quickly.

**One-handed adjustment**  
The reboarder Kio has five resting positions, whether placed in a front or rear-facing position. The resting position is very flat and enables little explorers the most wonderful rest for sweet dreams. Above all, parents value intuitive and simple operation with only a single hand. This way, car journeys are more relaxed for everyone.

# SALIA ELITE

The innovative jack of all trades.

From the hands of the midwife to home, paying a visit to the paediatrician for the first time and of course granny would also like to see the little one – the first few days in a baby's life are exciting. Through the combination of the light 2.9 kg infant carrier and the child seat, the 2-in-1 world-first Salia Elite brings together all the benefits of an infant carrier with the safety and comfort of a full-fledged reboarder for older children. The RECARO innovation gives parents the flexibility to shape their daily routine and allows the little ones to be comfortably and safely transported in all situations. So granny can show the little one the garden, nice and calmly.

RECARO  
EXPECTING SOMETHING  
**GREAT**

SAFETY FEATURES FOR EVERY JOURNEY

5-point harness system

The intuitive and central harness adjuster with HERO harness guide enables the child to be fastened into the seat securely and simply

One-handed adjustment

One-handed operation allows for a comfortable and flat resting position during the journey, facing away from the direction of traffic (three positions)

Newborn inlay

The variable newborn inlay for the infant carrier provides your baby with a flat and ergonomic reclining position

Air ventilation system

The passive air ventilation system makes extended sitting particularly comfortable while travelling

Seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

Indicators on the base

Show at a glance if everything is installed correctly with a green light

Coated belt tongues

Reduces heating up in hot weather – thus preventing your baby's sensitive skin from getting hurt

Height-adjustable headrest with integrated harness

Offers simple, individual adjustment for the growing child, thus providing them with an ergonomic sitting position

Memory foam in the headrest

Comfortable for the child and is particularly adept at absorbing forces resulting from a crash or collision

Patented HERO safety system

A single unit comprising shoulder pads, shoulder straps and headrest prevents the harness from twisting and slipping and simplifies the secure and easy fastening process

3-point harness system in the infant carrier

The intuitive and central harness adjuster with HERO harness guide enables the child to be fastened into the seat securely and simply

One-click installation with ISOFIX

Simpler and more secure one-click installation of the integrated ISOFIX base without the vehicle's seat belt

360 degree rotation

Just like that, with a single grip of the hand, the entire child seat can be rotated 360 degrees. Safe and ergonomic seating and removing of your child; the harness is fastened and unfastened quickly and free of stress. Now the entertaining journey can begin. What's left is more time – moments to enjoy together or very simply, having fun as a family.

Advanced Side Protection (ASP)

The integrated protectors can be quickly and simply folded out on the door side. In the event of a side collision, the energy absorbers reduce the force that would act upon the child. The combination of infant carrier, seat structure and side wings offer threefold protection from side collisions. In any car.

i-Size

Rear-facing transport, optimised side collision protection and the intuitive ISOFIX installation offer little explorers maximum safety in the rear seat. When facing away from the direction of travel, in the event of a frontal collision the forces are distributed across the entire body, whereby the sensitive head and neck areas stay protected. The child seat fulfils the stringent safety standards in accordance with UN R129.

2-in-1 innovation

As a world first, the Salia Elite combines the infant carrier and child seat. All safety-relevant features are built into the seat. As such, our safe all-rounder clocks in at a lightweight 2.9 kg when outside the vehicle. In this way, it makes the everyday routine for the mobile family easy. And the little ones? They can lie back, relax and continue dreaming.

Height-adjustable headrest with integrated harness

As they are still growing, an ergonomic posture is essential for children. The infant carrier's height-adjustable headrest with integrated harness allows for maximum seating comfort, supports healthy posture and, thanks to the optimised harness guide, increases safety on every journey.

Travel System

Psst, just let the baby sleep a while longer: a quick change from car to stroller for the RECARO infant carriers is possible thanks to special adapter – this flexibility allows you stress-free mobility in everyday situations.

PRACTICAL TRAVEL COMPANIONS

Salia Elite Adapter

# SALIA

The protective multi-talent.

How nice, when parents and children share the same hobbies. To ensure that the fun begins as soon as the journey does, we built the child seat Salia. It is even more comfortable and ergonomic than its predecessor. The 360 degree rotation allows parents to place their child in an ergonomic position while strapping them in or removing them from the vehicle. Turning the seat to one side is child’s play. And the best thing: one hand is kept free – to hold onto their favourite toy perhaps.

SAFETY FEATURES FOR EVERY JOURNEY

**Memory foam in the headrest**

Comfortable for the child and is particularly adept at absorbing forces resulting from a crash or collision

**5-point harness system**

The intuitive and central harness adjuster with HERO harness guide enables the child to be fastened into the seat securely and simply

**Seating foam**

Perfectly adapts to your child's body shape and provides the highest level of comfort

**Intuitive one-handed operation**

All important functions can intuitively be operated one-handed for more flexibility

**One-handed adjustment**

One-handed operation allows for a comfortable and flat resting position during the journey, facing away from the direction of traffic (three positions)

**Air ventilation system**

The passive air ventilation system makes extended sitting particularly comfortable while travelling

**Coated belt tongues**

Reduces heating up in hot weather – thus preventing your baby's sensitive skin from getting hurt

**Patented HERO safety system**

A single unit comprising shoulder pads, shoulder straps and headrest prevents the harness from twisting and slipping and simplifies the secure and easy fastening process

**Adjustable support leg**

Easy to adjust in the vehicle and improves stability

**One-click installation with ISOFIX**

Simpler and more secure one-click installation of the integrated ISOFIX base without the vehicle's seat belt

**360 degree rotation**

Just like that, with a single grip of the hand, the entire child seat can be rotated 360 degrees. Safe and ergonomic seating and removing of your child; the harness is fastened and unfastened quickly and free of stress. Now the entertaining journey can begin. What's left is more time – moments to enjoy together or very simply, having fun as a family.

**Advanced Side Protection (ASP)**

The integrated protectors can be quickly and simply folded out on the door side. In the event of a side collision, the energy absorbers reduce the force that would act upon the child. The combination of seat structure and side wings offer double protection from side collisions. In any car.

**i-Size**

Rear-facing transport, optimised side collision protection and the intuitive ISOFIX installation offer little explorers maximum safety in the rear seat. When facing away from the direction of travel, in the event of a frontal collision the forces are distributed across the entire body, whereby the sensitive head and neck areas stay protected. The child seat fulfils the stringent safety standards in accordance with UN R129.

**Newborn inlay**

Our extra soft newborn inlay is there to ensure that your child is optimally positioned in the child seat. This way, the little traveller enjoys the highest level of comfort and maximum safety. Naturally, the covers can be removed easily and cleaned in the washing machine. This provides further peace of mind for parents.

**Height-adjustable headrest with integrated harness**

As they are still growing, an ergonomic posture is essential for children. The height-adjustable headrest with integrated harness allows for maximum seating comfort, supports healthy posture and, thanks to the optimised harness guide, increases safety on every journey.

Indicators on the base

Would you like to gain back more time during your mobile family routine? The practical indicators on the base instantly give you the green light if the base and the child seat have been correctly installed, positioned and locked in. So, you will find all important information at a glance. But what’s more important: your child enjoys maximum safety.

PRACTICAL TRAVEL COMPANIONS

**Sun Canopy**  
00089220240070

With a UPF of 50, the large sun canopy with extendable sun visor is the ideal addition to the Salia family – and not only in summer. Thanks to the visor, the canopy can be optimally adjusted to your child’s sitting or resting position. Netting at the back of the sun canopy ensures the best possible ventilation.

# TIAN ELITE

The protective entertainer.

Children's birthdays are there to be celebrated. With our Tian Elite, just such a family celebration can come together, because the child seat can accompany your child from nine months to twelve years. To ensure they don't miss out on the fun on their way to the celebration the Tian Elite also has an integrated Sound System with loudspeakers in the head area. The air ventilation system in the seating area is also refreshing. Smart openings in the shell and the seat cover make this possible. This way, everyone can breathe easier, before you get to the Piñatas.

## MY BIRTHDAY PARTY

RECARO

Today  
is our  
rite

SAFETY FEATURES FOR EVERY JOURNEY

Universal installation

Quick and simple installation in any vehicle using its seat belt

Resting position

Relaxed sitting position thanks to adjustable seating angle (gr. 1)

Integrated harness storage

Easy conversion to group 2/3 through integrated harness storage with no need to expand the harness system

Extendable legrest

Can be adapted to your child's size and provide optimal support

Smart Protection Wings

Shoulder padding grows with the child thanks to the height-adjustable headrest

Seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

Coated belt tongues

Reduces heating up in hot weather – thus preventing your baby's sensitive skin from getting hurt (gr. 1)

Adaptive backrest

Backrest follows the contours of your vehicle's seats

5-point harness system

The intuitive and central harness adjuster with HERO harness guide enables the child to be fastened into the seat securely and simply (gr. 1)

Marked belt guide

The correct installation is facilitated by red belt guide markings

Advanced Side Protection (ASP)

Detachable protectors absorb all energy in the event of a side collision

Integrated Seatfix connectors

Simply fasten the child seat into the car using integrated Seatfix connectors (gr. 2/3)

Child seat that grows with them

One child seat for the whole childhood? The height-adjustable backrest with integrated headrest makes this possible. In this way, the child seat can be perfectly adjusted to the height of your child and automatically grows with them from nine months to twelve years.

Lightweight

Weighing approx. 8.6 kg, the Tian Elite can be quickly and easily lifted out of the vehicle, carried and reinstalled later. This makes things easier for mum and dad, but also for granny and grandpa. While we build our child seats, they are always designed with the entire family in mind.

Sound System

Integrated loudspeaker in the head area of the child seat, an audio connection and a device pouch enable little travellers to enjoy the finest in entertainment, without mum and dad having to listen to the child's radio play or favourite song in the front of the vehicle. In this way, the kids can lean back and relax and their heads remain protected by the headrest.

Universal installation

To ensure that the baby can also sit securely in the car when they are with granny and grandpa, the Tian Elite can be universally, quickly and simply installed using the vehicle's seat belt. A flexible solution for every family.

Air ventilation system

Fresh air keeps everyone happy. This is ensured by openings in the outer shell and mesh inserts in the seat cover, which allow for continuous air circulation. A greater level of comfort and well-being is impossible. Whether they are on a quick journey to see granny or with the whole family on holiday for the summer – the little explorers are kept in the best mood. Regardless of how long the journey is.

Patented HERO safety system

With the patented HERO safety system, your child can be simply and quickly strapped in. The unique HERO safety system combines shoulder pads, shoulder straps and headrest into a single unit and thus stops the harness from slipping and twisting. This saves time and worry during your everyday routine and above all increases safety on every trip.

# YOUNG SPORT HERO

The heroic sporting friend.

When travelling with your child is this comfortable, you don’t even need to take a break. Dad takes a look in the back regardless and is pleased to see that everything is going well in the child seat. Aside from that, he is reassured that his son and our Young Sport Hero are on holiday at granny’s together. The child seat can be removed or installed simply and quickly and secured in the vehicle using the seat belt.

## SAFETY FEATURES FOR EVERY JOURNEY

**5-point harness system**

The intuitive and central harness adjuster with HERO harness guide enables the child to be fastened into the seat securely and simply (gr. 1)

**Seat reducer**

For an optimal ergonomic fit from baby to small child (gr. 1)

**Seating foam**

Perfectly adapts to your child's body shape and provides the highest level of comfort

**Coated belt tongues**

Reduces heating up in hot weather – thus preventing your baby's sensitive skin from getting hurt (gr. 1)

**Marked belt guide**

The correct installation is facilitated by red belt guide markings

**Air ventilation system**

The passive air ventilation system makes sitting throughout long journeys particularly pleasant

**Reinforced armrests**

Comfortable sitting for older children with comfortable armrests

**Universal installation**

To ensure that the baby can also sit securely in the car when they are with granny and grandpa, the Young Hero Sport can be universally, quickly and simply installed using the vehicle's seat belt. Every family wishes for just such a hero.

Child seat that grows with them

One child seat for the whole childhood? The height-adjustable backrest with integrated headrest makes this possible. In this way, the child seat can be perfectly adjusted to the height of your child and automatically grows with them from nine months to twelve years.

Advanced Side Protection (ASP)

Whether nipping to football training or off on a big holiday: the integrated protectors offer maximum protection on every journey. In the event of a side collision, they absorb the force that would act upon the child. This way, children and parents can travel reassured.

Seat angle adjustment

The sitting area in the child seat can be adjusted to the resting position for small children within group 1. So your child can enjoy the highest levels of comfort, sitting or sleeping.

Lightweight

Weighing around 8 kg, the Young Sport Hero can be quickly and easily lifted out of the vehicle, carried and reinstalled later. This makes things easier for mum and dad, but also for granny and grandpa. While we build our child seats, they are always designed with the entire family in mind.

Patented HERO safety system

With the patented HERO safety system, your child can be simply and quickly strapped in. The unique HERO safety system combines shoulder pads, shoulder straps and headrest into a single unit and thus stops the harness from slipping and twisting. This saves time and worry during your everyday routine and above all increases safety on every trip.

# MONZA NOVA IS

## The multifaceted protector.

Dad's passion used to be for speed. Now he is a father, safety is his foremost concern. Above all, his son wants to enjoy the highest level of comfort and listen to his favourite radio show when driving. Our Monza Nova IS combines the demands of parents with the wishes of children. Integrated loudspeaker and an audio connection ensure the best level of entertainment. While small children are secured using the impact shield, older travellers are strapped in using the vehicle's seat belt. Greater driving enjoyment is only possible at Formula One or the funfair. The ADAC and Stiftung Warentest are also convinced of this and gave the multifaceted protector a test score of 2.0.

## SAFETY FEATURES FOR EVERY JOURNEY

### Universal installation

Can be installed in cars without ISOFIX simply and quickly using the vehicle's seat belt

### Reinforced armrests

Offer more protection in the hip area and enable comfortable sitting for older children

### Seating foam

Perfectly adapts to your child's body shape and provides the highest level of comfort

### Marked belt guide

The correct installation is facilitated by red belt guide markings

### Integrated Seatfix connectors

Simply fasten the child seat into the car using integrated Seatfix connectors

### Child seat that grows with them

One child seat for the whole childhood? The height-adjustable headrest makes this possible. In this way, the child seat can be perfectly adjusted to the height of your child and automatically grows with them from nine months to twelve years.

### Sound System

Integrated loudspeaker in the head area of the child seat, an audio connection and a device pouch enable little travellers to enjoy the finest in entertainment, without mum and dad having to listen to the child's radio play or favourite song in the front of the vehicle. In this way, the kids can lean back and relax and their heads remain protected by the headrest.

**Advanced Side Protection (ASP)**  
Whether nipping to football training or off on a big holiday: the integrated protectors offer maximum protection on every journey. In the event of a side collision, they absorb the force that would act upon the child. This way, children and parents can travel reassured.

**Air ventilation system**  
Fresh air keeps everyone happy. That's why the passive air ventilation system ensures continuous air circulation. A greater level of comfort and well-being is impossible. Whether they are on a quick journey to see granny or with the whole family on holiday for the summer – the little explorers are kept in the best mood. Regardless of how long the journey is.

**Integrated head cushion**  
The integrated head cushion positioned at head height supports well-being and safety on every journey. Especially when sleeping, little and bigger adventurers benefit from significantly more comfort. The cushion is fully adjustable and can be individually adapted to your child.

**Impact shield**

For the little children within group 1, the child seat is used with the impact shield and secured with the vehicle's seat belt. The impact shield encircles the child, distributes and absorbs the energy from a collision over its entire surface – comparable to the function of an airbag. Thus, the child's sensitive neck, head and chest area are protected. Older children (gr. 2/3) are strapped in with the vehicle's seat belt. For maximum comfort and a secure journey over every kilometre.

# MAKO ELITE

The entertaining bodyguard.

Even as your child gets bigger, the desire for maximum safety remains. With the child seat Mako Elite, your child aged from approx. 3.5 to 12 years is secure and protected on every journey. Smart openings on the outer shell of the child seat ensure optimal air circulation. The integrated Sound System provides the finest entertainment for young travellers. Whether going to the football or city with either mum or dad, with this level of entertainment, every journey is fun.

BECAUSE YOU ARE  
DADDY'S **PRIDE AND  
JOY** – EVERYDAY.

RECARO

SAFETY FEATURES FOR EVERY JOURNEY

**Seating foam**  
Perfectly adapts to your child's body shape and provides the highest level of comfort

**Extendable legrest**  
Can be adapted to your child's size and provide optimal support

**Adaptive backrest**  
Backrest follows the contours of your vehicle's seats

**ISOFIX connectors**  
Quick and secure placement and optimal stabilisation of the child seat in the vehicle

**i-Size**  
With i-Size, the child seat fulfils the stringent safety standards in accordance with UN R129. These high requirements on side impact protection are not only met, they are exceeded. Parents benefit from simple and secure installation thanks to ISOFIX connectors. The child seat is compatible with all vehicle seats bearing the i-Size logo and virtually all other seating with ISOFIX connectors. Children travel safely and parents enjoy complete flexibility.

**Sound System**  
Integrated loudspeaker in the head area of the child seat and an audio connection enable little travellers to enjoy the finest in entertainment, without mum and dad having to listen to the child's radio play or favourite song in the front of the vehicle. In this way, the kids can lean back and relax and their heads remain protected by the headrest.

**Air ventilation system**  
Fresh air keeps everyone happy. This is ensured by openings in the outer shell and mesh inserts in the seat cover, which allow for continuous air circulation. A greater level of comfort and well-being is impossible. Whether they are on a quick journey to see granny or with the whole family on holiday for the summer – this way the little explorers are kept in the best mood. Regardless of how long the journey is.

**Advanced Side Protection (ASP)**  
The detachable protectors can be affixed quickly and simply to the child seat. In the event of a side collision, the energy absorbers reduce the force that would act upon the child. As such, they offer maximum protection. To this end, we recommend always installing the protectors on the door side to offer the best possible protection. In any car.

**Height-adjustable headrest**  
As they are still growing, an ergonomic posture is essential for children. The height-adjustable backrest with integrated headrest allows for maximum seating comfort, supports healthy posture and, thanks to the optimised harness guide, increases safety on every journey.

Smart Protection Wings

Padded wings at shoulder height automatically adjust to the height of the child and ensure that the little adventurers are kept even safer and more comfortable in the child seat. And the best thing: the Smart Protection Wings grow with the child thanks to the adjustable backrest – up to 12 years or a height of 150 cm.

# MAKO

The comfortable travel mate.

All short and long journeys will be better from now on. The special seating foam in the Mako child seat perfectly adjusts to the body shape of your child and provides ergonomic support. With this level of seating comfort, the little explorer won't even want to get out for ice cream. And they don't have to, the cover is machine washable. Only princesses and racing drivers travel in such comfort.

## SAFETY FEATURES FOR EVERY JOURNEY

**Height-adjustable headrest**

Offers simple, individual adjustment for the growing child and facilitates an ergonomic sitting position

**i-Size**

Tested and approved in accordance with UN R129 for maximum safety

**Seating foam**

Perfectly adapts to your child's body shape and provides the highest level of comfort

**Advanced Side Protection (ASP)**

Protective side wings with integrated ASP system absorb the force in the event of a side collision

**Shoulder protectors**

Provide support and ensure maximum safety in the event of a side collision

**Adaptive backrest**

Backrest follows the contours of your vehicle's seats

**ISOFIX connectors**

Quick and secure placement and optimal stabilisation of the child seat in the vehicle

# MAKE YOUR CHOICE

Individually mobile – anywhere, on any path. RECARO’s products make it possible. Our strollers Sadena and Celona can adapt to your family’s needs. With the 4-in-1 Travel System consisting of the Sadena/Celona Seat Unit, Carry Cot, Light Cot and RECARO infant carriers your family will have the right partner for every situation – whether you’re on a long journey of discovery or just enjoying a leisurely stroll through town.

## MODULARITY – FREELY CONFIGURABLE

Practical functionality and modern design – RECARO’s products combine both. Put together the right stroller to suit your tastes and your family’s individual needs. The strollers Sadena and Celona consist of individual, combinable units. This means you can choose the frames according to your personal preferences and then combine them with the the Sadena/Celona Seat Unit,

Carry Cot, Light Cot or RECARO infant carriers. The stroller’s colours are also entirely up to you: a classic, black frame with a seat unit in Select Teal Green? Or perhaps a silver frame with a carry cot in one of the Prime colours? No problem. Combine the individual units the way you and your loved ones like best.

# ENJOY YOUR FAMILY OUTING

Together with your perfect companion.

No matter which stroller you choose, RECARO has the perfect Sadena/Celona Seat Unit, Carry Cot, Light Cot or RECARO infant carrier. Right from day one.

With a comfortable seat unit, it's up to you: your little one can either sit facing you or – if there's a lot to discover – keep track of everything facing forward. It's also possible to lay the seat completely flat – to let the really little ones relax, or just for a bit of a nap. The matching carry cot is perfect for your newborn. So that your baby can gently drift to sleep. You can also choose the light cot which can be easily attached to the seat unit. The newborn is protected like in a cocoon, the older ones enjoy a cosy footmuff. The adapter required to combine the strollers with the RECARO infant carriers are included. Your mobility knows no limits.

## YOU HAVE THE CHOICE – CHOOSE YOUR FAVOURITE

**SADENA**

- + Thanks to compact dimensions, easy to manoeuvre and super agile
- + Due to its narrow wheelbase, the Sadena is practically made for public transport
- + Ideal for the urban environment thanks to its lightweight and compact folding dimensions
- + High-quality frame and first-class chassis provide maximum comfort on all journeys

**CELONA**

- + High level of comfort due to its large, spring-mounted wheels
- + The large shopping basket offers enough space for baby bottles, nappies and much more
- + Due to its high sitting position, the Celona is the ideal replacement for a high chair
- + Particularly ergonomic for all body sizes thanks to the wide adjustment range of the handle

# SADENA/CELONA SEAT UNIT

Extra comfort.

**Smart harness system**

Strapping in your child is made easier thanks to the harness buckle and shoulder straps, which jump forward and stay open when the child is removed

**Patented HERO safety system**

A single unit comprising shoulder pads, shoulder straps and headrest prevents the harness from twisting and slipping

**5-point harness**

With additional shoulder and crotch pads - soft material for extra comfort

**Bumper bar**

Can be turned to one side and opened on both sides to aid placing the child in the buggy

**Height-adjustable headrest with integrated harness**

Offers simple, individual and simultaneous adjustment of headrest and harness for the growing child with just one hand

**Flexible seat**

Can be installed in the stroller facing towards and away from the direction of travel

**Additional accessory**

The included rain cover with reflectors and opening window is a perfect fit with the seat unit

**XXL sun canopy**

The extra large extendable sun canopy with UPF 50 is like a cocoon, protects against outside disturbances and thus creates an island of calm

**Viewing window in sun canopy**

Net ensures optimal air circulation and parents always have the child in sight

**Ergonomic headrest**

Extra padding in the head area offers additional comfort and prevents the sensitive head slipping to one side during sleep

**Memory buttons**

Enables one-handed removal of the seat unit

**Ergonomic resting from birth**

Fully adjustable, one-handed backrest and legrest for a flat and ergonomic position

**Air ventilation system**

Smart openings in the outer shell and mesh inserts in the seat cover allow for continuous air circulation

**Foam seat padding**

Perfectly adapts to your child's body shape and provides the highest level of comfort

# SADENA/CELONA CARRY COT

Comfort and protection right from the start.

**Large extendable sun canopy**  
Sun canopy and visor with UPF 50 provide protection from sun, wind and bad weather

**Spacious soft foam mattress with bamboo fibre cover**  
Soft, comfortable and ergonomic resting

**Memory buttons**  
Enables one-handed attaching and removal of the carry cot without using additional adapter

**Integrated carry handle**  
Ergonomic handle for balanced carrying

**Wind cover**  
Additional protection for cold days while zipper allows simple opening for easy entry

**Additional accessory**  
The included rain cover with reflectors and opening window is a perfect fit with the carry cot

**Viewing window in sun canopy**  
Net ensures optimal air circulation and parents always have the child in sight

**Panoramic view**  
For an unobstructed view and optimal air circulation in the carry cot

**Matching design**  
Colors, accent and overall appearance are perfectly aligned with all Sadena and Celona products

**From the first day**  
Can be used up to a weight of max. 9 kg

# SADENA/CELONA LIGHT COT

More than a footmuff.

**2-in-1 travel solution**  
Up to max. 6 months as a lightweight newborn cot, later as a cosy footmuff

**Spacious mattress with bamboo fibre cover**  
Soft, comfortable and ergonomic resting

**Foldable with the stroller**  
Due to it's weight and special fabric, no need to remove the light cot

**Easy attachment and removal**  
Openings for 5-point harness and elastic straps ensure simple handling

**Dirt-repellent coating in foot area**  
Wipeable material allows easy cleaning despite dirty child's shoes

**Cocoon protection**  
Water-repellent outer material and cosy inner fabric beat wind, cold and rain

**Growing footmuff**  
Size can be extended for larger children

**Matching design**  
Colors, accents and overall appearance are perfectly aligned with all the Sadena and Celona products

SADENA

# SADENA

The agile leisure companion.

reddot winner 2020

With a child, even the smallest journeys become a big experience. Our modular system with the stroller Sadena is the perfect companion – whether you're at the airport or in the city. As one of the slimmest strollers of its kind, with a width of just 54 cm, the Sadena impresses with its agility and is well-suited for use in an urban setting. Even when folded it can't be beaten on performance, with just one hand it can easily be reduced down to a small, compact form and stowed away.

FEATURES FOR EVERY JOURNEY

**Adjustable handle**

Can be ergonomically adjusted to any body size with three settings

**Reflectors**

Improved visibility for more safety in the metropolitan jungle in low light conditions

**Large shopping basket**

Easily accessible large shopping basket with up to 5 kg capacity

**Swivelling front wheels**

Simple manoeuvring thanks to lockable 360 degree swivelling wheels

**Detachable wheels**

For an even more compact folded form

**Flip-flop brakes**

Brakes can be operated with all types of shoes or barefoot

**Puncture-proof wheels**

The maintenance-free, foam-filled wheels are easy to look after and can take on any terrain, be it asphalt, gravel or park paths

**Additional accessories**

With the adapter supplied with the product, you can transform the Sadena and the RECARO infant carriers into a Travel System

**Full suspension**

Highly comfortable chassis ensures extremely smooth gliding across any surface

**Light wheels**

The four smooth running wheels are ideal for use in an urban environment

**One-handed folding mechanism**

The stroller Sadena can be simply and quickly folded away with just one hand. The stroller can be folded with the seat unit facing forwards or rear-facing. Self-standing and with the most compact size possible when folded, it takes up very little space in the boot. The integrated carry handle is coated with faux leather, which makes carrying, loading and stowing away the stroller easier. Your ideal companion on the go.

**One of the slimmest of its kind**

Thanks to its narrow wheelbase, the Sadena manages even the narrowest passages in the city with ease. Whether entering the metro or a small boutique – no path is too narrow. For the urban environment in particular, with the Sadena you have made exactly the right choice.

54 cm

**Ergonomic resting from birth**

To ensure that your baby can comfortably have a little nap on every trip, the backrest and legrest can be adjusted to an ergonomic reclining position with just one hand – incredibly practical. This way, mum and dad stay comfortable, too.

Simple operation

As a parent, you really need three or more hands. That's why our Sadena doesn't just feature one-handed pushing and steering, many other functions can be carried with just one hand, too.

4-in-1 Travel System

Psst, just let the baby sleep a while longer: our 4-in-1 Travel System comprising of Seat Unit, Carry Cot, Light Cot and RECARO infant carriers allows you stress-free mobility in all everyday situations. One frame – four possibilities. The included RECARO car seat adapter enable quick changing from car to stroller at any time.

Height-adjustable headrest with integrated harness

With just one hand the headrest and the harness can be adjusted simultaneous. The simple and individual adjustment allows always the perfect position to the child's size and supports the healthy posture. Ergonomically padding in the head area offers additional comfort and prevents the sensitive head slipping to one side while the child sleeps. Additional shoulder and crotch pads complete the extra comfort within the seat unit.

# CELONA

The comfortable adventure mate.

Go on a tour of discovery with the whole family. With our stroller Celona you and your child can go off and conquer the world as soon as they are born. Our modular system with the stroller Celona is the perfect everyday companion. The system, comprising of the seat unit, carry cot, light cot and infant carrier, is not only practical, but also ensures the safety of your child in any situation. Very comfortable and easy – even over rough terrain. The large rear wheels and outstanding suspension ensure that every trip is as comfortable as possible, whether travelling over rough or smooth ground. The ergonomic resting area, together with the integrated headrest, which stabilises the sensitive head and provides additional comfort, make things so comfortable for the little adventurers that they can happily sleep when on the go.

FEATURES FOR EVERY JOURNEY

**Height-adjustable handle**

Can be ergonomically adjusted to any body size

**Flip-flop brakes**

Brakes can be operated with all types of shoes or barefoot

One frame – four possibilities. The included RECARO car seat adapter enable quick changing from car to stroller at any time.

**Ergonomic resting from birth**

To ensure that your baby can lie back comfortably on every trip, the backrest and legrest can be adjusted to an ergonomic reclining position with just one hand – incredibly practical. This way, mum and dad stay comfortable, too.

**Height-adjustable headrest with integrated harness**

With just one hand the headrest and the harness can be adjusted simultaneously. The simple and individual adjustment allows always the perfect position to the child's size and supports the healthy posture. Ergonomically padding in the head area offers additional comfort and prevents the sensitive head slipping to one side while the child sleeps. Additional shoulder and crotch pads complete the extra comfort within the seat unit.

Sitting position at table height

After all, there is nothing more exciting than watching the adults. With a sitting height of 50 cm, in our Celona your baby can follow the events at the table or comfortably be fed by mum or dad. For the highest comfort and most valuable experiences.

Full suspension

The four-wheel suspension and the highly comfortable chassis compensate for uneven surfaces. This means the Celona can glide incredibly smoothly across any terrain. Only flying is smoother.

One-handed folding mechanism

The stroller Celona can be simply and quickly folded away with just one hand. The stroller can be folded with the seat unit facing forwards or rear-facing. Self-standing and with the most compact size possible when folded, it takes up very little space in the boot. The integrated carry handle is coated with faux leather, which makes carrying, loading and stowing away the stroller easier. Your ideal companion on the go.

# CITYLIFE

The ergonomic everyday companion.

Caution, on your next museum visit, our Citylife could well steal the show from one artwork or another. Because with the totally adjustable backrest and legrest, it provides little museum visitors with a particularly flat and ergonomic reclining position. Mum can also relax after the visit: with the one-handed folding mechanism the Citylife can be folded into a compact form and stowed in the boot with just one hand in no time at all. And it still looks sleek: in 2017 it won the German Design Award. A real work of art.

## SAFETY FEATURES FOR EVERY JOURNEY

**5-point harness system**

With additional pads on the shoulder straps – soft for extra comfort

**Wipeable foot area**

Simple and convenient cleaning after every trip

**Swivelling front wheels**

Simple manoeuvring thanks to lockable 360 degree swivelling wheels

**Additional accessories**

Rain cover, cup holder and bumper bar included

**Adjustable handle**

Can be ergonomically adjusted to any body size with three settings

**Flip-flop brakes**

Brakes can be operated with all types of shoes or barefoot

**Detachable wheels**

For an even more compact folded form

**Full suspension**

Allows for particularly smooth gliding and the best travel comfort across uneven surfaces

**One-handed folding mechanism**

The stroller Citylife can be simply and quickly folded away with just one hand. Self-standing and with the most compact size possible when folded, it takes up very little space in the boot. Your ideal companion on the go.

Adjustable backrest and legrest

Watch mum and dad while shopping or better to have a rest? The fully adjustable backrest, combined with the padding and adjustable legrest, allows for a comfortable resting position. A good mood for all included.

3-in-1 Travel System

Our 3-in-1 Travel System, comprising of the seat unit, infant carrier and carry cot, allows you stress-free mobility in all everyday situations. One frame – three possibilities. The adapter matching the carry cot and the RECARO infant carriers enable quick changing from car to stroller at any time.

Extra large sun canopy

The extra large sun canopy with extendable sun visor and UPF 50 offers comfortable protection from sun, wind and bad weather. No matter the time of year, nothing can get in the way of a family excursion.

Extra large shopping basket

With the extra large shopping basket, you are prepared for everything. Easy accessibility and ergonomic handling provide you with the highest comfort. The shopping basket is optimally protected underneath your child and provides plenty of space.

Puncture-proof wheels

Four foam-filled wheels bring you safely across all terrain, with no need for maintenance. With good shock absorption and a high level of travel comfort, you can skilfully master every high street and park path – and look very good doing it.

# EASYLIFE ELITE 2

The charming city friend.

Off to meet a friend in the café after a walk in the park? No problem with the Easylife Elite 2. The fully adjustable backrest and legrest provide babies with a comfortable reclining position from the very beginning. No need to hurry, if necessary the little one can simply have a nap. And when it's time to go home, mum benefits from the one-handed folding mechanism. Because the Easylife Elite 2 can be folded away into a compact form in an instant.

## SAFETY FEATURES FOR EVERY JOURNEY

**Viewing window in sun canopy**  
Net ensures optimal air circulation and parents always have the child in sight

**Reflectors**  
Improved visibility for more safety in the metropolitan jungle in low light conditions

**Bumper bar**  
Can be turned to one side and opened on both sides to aid placing the child in the buggy

**Foot step**  
Little children use it to help them climb into the buggy, bigger children lay their feet comfortably on top

**Detachable wheels**  
For an even more compact folded form

**Swivelling front wheels**  
Simple manoeuvring thanks to lockable 360 degree swivelling wheels

**Universal handle**  
For greater agility the buggy can be pushed and steered through the city one-handed

**5-point harness system**  
With additional shoulder and crotch pads – soft material for extra comfort

**Extra large shopping basket**  
Easily accessible extra large shopping basket with up to 5 kg capacity

**Puncture-proof wheels**  
The maintenance-free, foam-filled wheels are easy to look after and can take on any terrain, be it asphalt, gravel or park paths

**Flip-flop brakes**  
Brakes can be operated with all types of shoes or barefoot

**Full suspension**  
Allows for particularly smooth gliding and the best travel comfort across uneven surfaces

**Additional accessory**  
The included rain cover is a perfect fit with the buggy

**One-handed folding mechanism**  
The buggy Easylife Elite 2 can be simply and quickly folded away with just one hand. Self-standing and with the most compact size possible when folded, it takes up very little space in the boot. Your ideal companion on the go.

Ergonomic sitting and reclining

The adjustable backrest and legrest make the journey more comfortable for your child. You can set up a flat reclining position for your newborn or various sitting positions for your older child. Whether your little one is sleeping deeply or sitting up, wide awake and exploring the world, they are very comfortable.

Extra large sun canopy

The extra large sun canopy with extendable sun visor and UPF 50 offers comfortable protection from sun, wind and bad weather. No matter the time of year, nothing can get in the way of a family excursion.

Travel System

Psst, just let the baby sleep a while longer: a quick change from car to buggy for the RECARO infant carriers is possible thanks to special adapter – this flexibility allows you stress-free mobility in everyday situations.

Air ventilation system

On warm days, your baby will benefit from the airy mesh inserts. These allow fresh air to reach their skin, are breathable and prevent your child from becoming too hot. This way, the little passengers feel completely and consistently at ease.

Comfort inlay

So that every journey your baby takes is as pleasant as possible, the buggy Easylife Elite 2 has an extra soft comfort inlay. This way, the little ones can relax and nap in comfort on any journey.

# EASYLIFE 2

## The flexible scout.

With a small child, every day is an adventure. How fortunate that the Easylife 2 provides optimal support for modern families in their everyday lives. At six kilograms, the agile buggy is truly lightweight. It offers babies the comfort of a buggy from six months. It also makes life easy for parents: with the one-handed folding mechanism, the Easylife 2 can be folded away into the smallest of spaces. This way, it will fit in any boot – with space left for the shopping.

### SAFETY FEATURES FOR EVERY JOURNEY

#### Extra large sun canopy

Sun canopy with UPF 50 provides protection from sun, wind and bad weather

#### Puncture-proof wheels

The maintenance-free, foam-filled wheels are easy to look after and can take on any terrain, be it asphalt, gravel or park paths

#### Foot rest

Little children use it to help them climb into the buggy, bigger children lay their feet comfortably on top

#### Swivelling front wheels

Simple manoeuvring thanks to lockable 360 degree swivelling wheels

#### Universal handle

For greater agility, the buggy can be pushed and steered through the city one-handed

#### 5-point harness system

With additional shoulder pads – soft material for extra comfort

#### Extra large shopping basket

Easily accessible extra large shopping basket with up to 5 kg capacity

#### Flip-flop brakes

Brakes can be operated with all types of shoes or barefoot

#### Detachable wheels

For an even more compact folded form

#### Ultra lightweight

At just 6 kg, the buggy Easylife 2 is ultra light and thus a featherweight of this type. This is noticeable during daily loading and unloading, when going over steps or barriers and of course when wandering around the inner city during the day.

#### One-handed folding mechanism

The Easylife 2 can be simply and quickly folded away with just one hand. Self-standing and with the most compact size possible when folded, it takes up very little space in the boot. Your ideal companion on the go.

**Adjustable backrest**

Watch mum and dad while shopping or better to have a rest? The fully adjustable backrest, combined with the padding and the integrated legrest, allows for a comfortable resting position. A good mood for all included.

**Travel System**

Psst, just let the baby sleep a while longer: a quick change from car to buggy for the RECARO infant carriers is possible thanks to special adapter – this flexibility allows you stress-free mobility in everyday situations.

**Air ventilation system**

On warm days, your baby will benefit from the airy mesh inserts. These allow fresh air to reach their skin, are breathable and prevent your child from becoming too hot. This way, the little passengers feel completely and consistently at ease.

**Full suspension**

No matter which route you take, with full suspension on the front and rear wheels, the Easylife 2 glides over any uneven terrain. This makes things easier for parents and more pleasant for the little passengers, so that they can enjoy every trip.

PRACTICAL TRAVEL COMPANIONS

**Rain Cover**  
00089210010070

Our rain cover for the Easylife family will keep your child safe and dry. It is easy to mount and comes off in no time. The transparent material allows eye contact at any time.
